Turn your Laptop and GPS into a Chartplotter using C-Map charts, and...

SOFTWARE-ON-BOARD

Mouse or Touchscreen operation

SOB is a Windows™ navigation program which gives real-time on-screen chart positioning and advanced navigation calculations, displayed in easily understood data panels - automating and simplifying the process of planning, piloting and navigation.

SOB IS ONE PROGRAM

**NO EXTRA ADD-ON MODULES
NO EXTRA COSTS**

- ONE Program - One Technical Support - FREE For LIFE**
 - DigiBOAT handles ALL your technical queries
- ONE Program - Over HALF A MILLION Users**
 - In 150 Countries
- ONE Program - ZERO Safety Implications**
 - Instruct family and friends, whatever age, and plan journeys at home, office or classroom in 100% safe environments
- ONE Program - Use on THREE Computers***
 - *Standard & Professional
- ONE Program - A wealth of Features / Benefits**
 - Continual development - New features / benefits added
- ONE Program - THREE Options & Prices**
 - Standard - Professional - Commercial
- ONE Program - SEVEN Languages/Translations (More under development)**
 - ALL in the same program

NAVIGATION JUST GOT EASY

GRIB Example - North Atlantic

SOB is compatible with the worldwide GRIB weather data. This data is supplied freely by numerous weather agencies around the world by using a simple exchange of emails. SOB will seamlessly interface with most Email programs making the GRIB data requests simple and painless.

When received, the emailed data is decoded and overlaid onto the chart in a simple manner to enhance your voyages - providing predictions and current-state information right on the chart - where you need it.

Race Start

"Race Start" is a dedicated feature to help get the best start in a yacht race.

Set the time-to-go-to-start and select whether to start (1) perpendicular to the line; (2) on your current heading; or (3) on optimum port/starboard tack angle.

Now, at a glance, you will see if you are fast or slow to the line, and much other data to help you achieve the perfect start.
