

Airo Handheld Ultra Rugged PDA

Waterproof
 Built to MIL Specs
 Touchscreen
 Lithium battery
 Built in GPS

Airo is a powerful and rugged handheld PDA utilising Windows Mobile 6 as an operating system. Drop, dust and waterproof, it's built for the most demanding situations to MIL specifications. Features include built in quad band GSM phone (with internet and email connectivity), GPS and high resolution touch screen colour display

Drop proof, dust proof, water proof handheld PDA with GSM phone and GPS....

- Compact handheld PDA - dust, drop and waterproof (IPX7). Mil 810F compliance - Shock resistant to 20g, drop resistant 1.25m onto concrete 26 times
- 2.8" High resolution 320 x 240 pixel touchscreen
- Intel XScale PXA270 processor 520 MHz
- 1570 mAh lithium rechargeable battery
- Quad band GSM phone
- Built in 12 channel GPS
- Dedicated programmable DISTRESS key
- mini SD slot for charting or memory expansion
- Built in Windows Mobile 6 applications such as Pocket Word, Excel, Outlook and Powerpoint
- Rocker-pad cursor control

Add C-EMap Charting

Take advantage of AIRO's stunning high bright, colour 320 x 240 pixel touch screen and add C-EMap charting data available on plug in mini format SD cards. Zoom in for an impressive level of detail with buoy and nav information available as a drill down. Instantly create a goto or mark, record your track and see your position (from the built in GPS) displayed on the detailed electronic charts.

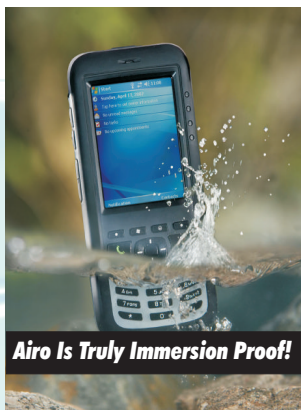

Airo is also compatible with other Windows Mobile charting software such as MemoryMap/Maptech Pocket Navigator

Airo is a fantastic, one product solution for on board communication, entertainment, email, internet access and navigation - plus a lot more! It's a sophisticated and highly accurate GPS receiver with C-Map chart plotting option, a global quad band GSM phone (SIM free for use with your existing telephone card) and e-mail client. It also acts as a multi-media device with audio and video playback capability and photo viewer. Need to catch up on an office file or worksheet whilst afloat? - No problems, thanks to built in Pocket Word, Excel and Powerpoint - and you can add any compatible Windows Mobile software application

And Airo includes a programmable distress key - press and hold to access Airo emergency services with your current position immediately relayed to a service of your choice.

Airo sophistication doesn't stop there. Thanks to a proprietary over the air IP protocol, units can be interrogated and programmed remotely allowing sophisticated tracking and software solutions to be remotely deployed. Applications such as group locate and track for yacht racing or fishing boat monitoring and web tracking can be customised for the Airo

Airo units come pre-configured with a eanywhere.co.uk email account. Various subscription email marine data and weather packages will be available allowing the latest marine weather data to be displayed including navtex and RTTY messages
